

TrayShrinkPacker

The choice is yours: Whether tray, tray and film, pad and film, or only film - with the KHS Kisters TrayShrinkPacker all possibilities are open to you. Prepacked product groups, loose products, different product diameters and heights, and/or changing pack formations - nearly everything is possible. The fully automatic KHS Kisters TrayShrinkPackers are user-friendly, reliable and flexible in use. Top speeds of up to 120 cycles per minute offer efficient possibilities in the beverage industry as well as in the food and non-food sectors.

The tight folding of the trays around the products guarantees a high stability of the pack. The use of printed film is a successful way presenting and selling more items at once.

 **KHS Kisters**

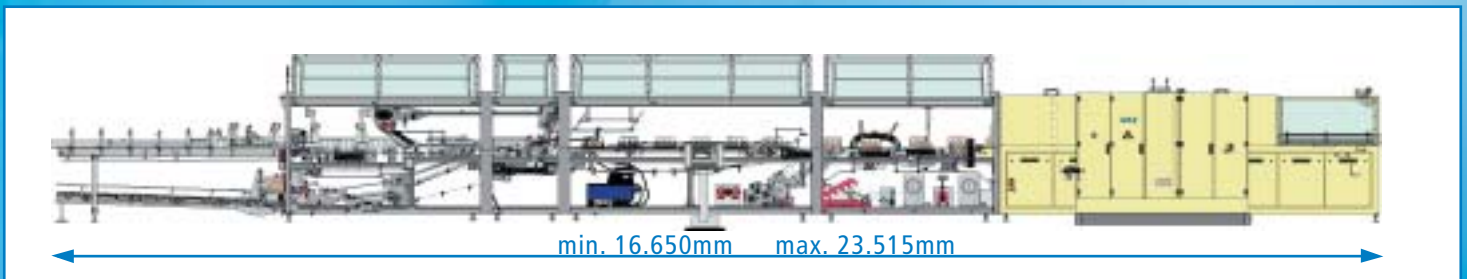

Your advantages:

- Possibility of equipping the machine with an electronic print positioning system to allow the use of register printed film. This is an important marketing advantage in comparison to unprinted, transparent film
- Automatic speed adaptation to the quantity of products fed in
- Control by short-circuit and pole-reversal proof microprocessors
- An error and diagnosis display integrated in the operator control panel reduces downtime to a minimum
- Automatic centralized lubrication system
- Very high production efficiency
- Less time required for changeover
- Either Siemens S7/400 or AB Control Logix controls

Options:

- Dual-lane version
- Use of corrugated board or U-pads instead of trays

Standard Technical Data Modular TrayShrinkPacker

Innopack TSP TrayShrinkPacker *

Speed From 60 up to 120 cycles/minute

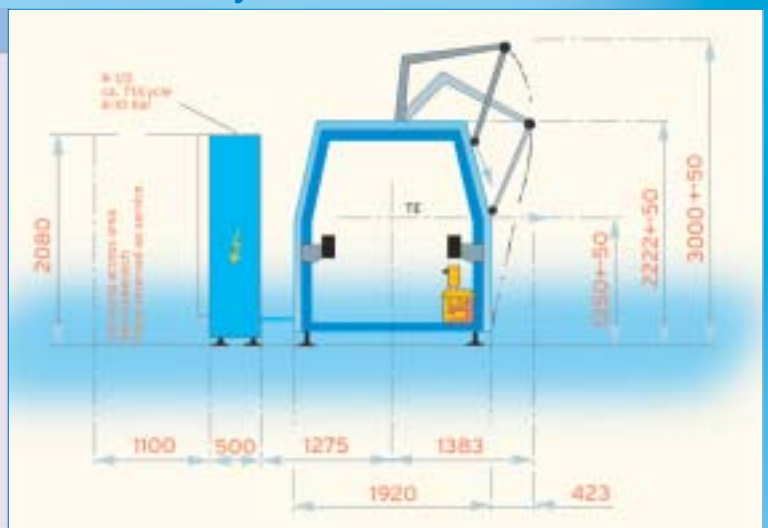

Product dimensions
 diameter: 48 - 120 mm
 height: 58 - 360 mm

Film sheets
 length: 350 - 1300 mm
 width: 180 - 880 mm

Film thickness 40 - 90 μ

Pack dimensions (in mm)

* All maximum values may not apply together
